<sup>††</sup> Milk/ton calculated from NIRS data using Milk2006. Bold values are significantly above test average. GC = grower comparison entry, \* = brands without a seed lot number, ns = not significantly different

**TEST COMMENTS:** Good tall plants with some hybrids chopper box height. Excellent ear fill to the tip on most ears. Two days of strong wind just before harvest elevated hybrid dry down.

Disease pressure was light to medium. Late season moisture was on the short side, but the plants held on well. Samples frozen then analyzed by Dairyland Labs.
