^{††} Milk/ton calculated from NIRS data using Milk2006. Bold values are significantly above test average. GC = grower comparison entry, * = brands without a seed lot number, ns = not significantly different

TEST COMMENTS: *This field was unharvestable due a storm on 7/11 causing severe root lodging. Harvest was attempted but it was impossible to consistently gather all plants causing poor quality yield data. This test location had the potential for high yields. Ear fill was complete to the tip and plant health was good.*
