Rich H. Lehmann
 F.I.R.S.T. Manager

TEST COMMENTS: As the yields indicate, this was an area that received rain just when they needed it. Good quality grain with deep kernel set here, which made for easy shelling off the cob. Some light fusarium ear rot present. Lodging was light at harvest but stalks were starting to weaken. Lat: 40.36325, Long: -85.89882

Yield & Income Factors:	Base Moisture = 15.0%	Shrink = 1.3	Drying = \$0.025	Price = \$7.50
† See last page for Product/Brand, Technology and Seed Treatment information.				
→ Identifies the check brand included in early- and full-season tests. Bold yields are significantly above test average. Italicized brands exceed the grain moisture limit for this test. GC = grower comparison product, ns = not significantly different
