TEST COMMENTS: *This field was surprisingly decent. For a dry year, 6.39" of rain most before planting, plants had good medium height. There was some smut present but not as heavy as seen in other fields. The majority of the hybrids developed an ear on every plant. Once again, we are seeing milk line all over the board as the pollination was affected by the heat. Some ears have a dented kernel next to a dough stage kernel. Samples analyzed by Dairyland Laboratories, Inc.*
