TEST COMMENTS: *This field received some timely rains that the surrounding area did not. A storm produced some hail, but not enough to do much damage. Root lodging was seen throughout the plot. Some ear smut was noted. Other diseases were minimal and did not have a real effect on hybrid performance. Overall, this was a very good test. Ear fill was good to excellent. It was nice to see the wagon full of grain not just fodder. Samples analyzed by Dairyland Laboratories.*
