Test Comments: *The corn at this site had impressive ear size, filled to the tip with large kernels and gave the impression that it yield well. Harvest was a huge challenge. Grain moistures were high and variable. Cob strength ranged from soft to solid. Shelling all corn off the cob was difficult due to soft fragile cobs. Grain test weight was very low, contributing to the disappointing yield. Overall corn stood well at harvest.*

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
