Test Comments: This area had a very tight window to accomplish spring field work and planting. Following record snowfall on May 2, May rainfall over 8" made field conditions difficult for planting. Many acres on Bob's surrounding field were not planted due to cold and wet weather that kept fields nearly saturated through June. Despite the crop development delays, kernel fill and crop finish were strong.

Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
