Test Comments: *The area received an abundance of rain in May, around 13 inches, and another 5 inches in June. Rain was limited in July and August, less than total 3 inches fell. Despite this stress, the tests looked pretty good. Long slender ears were well pollinated but kernel depth was lacking. Plants looked healthy and stood quite well at harvest. Prior to harvest, rainy season began, making harvest a challenge.*

Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
