Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Price = \$4.50 Local GMO / \$4.95 non-GMO

Test Comments: Mike said that his sidedress nitrogen really helped improve his farm's yields this year and its apparent in the trials.

Abundant early season rains potentially leached away some herbicide and nitrogen. The trials had a few signs of green snap, but most lodging reported was due to stalk rot. Plant heights were 9-11 feet and ear development was excellent. Kernel depth was 1/2" inch. Excellent trials!

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
