Test Comments: Excellent yield for a June 11th planting date. The rainfall occurring August and later must be responsible for the high grain moisture at this late date. Deep kernels had good cob retention making them difficult to thresh. Robust plant height ranged from 10-12'. Stalks stood well with minimal lodging. Thanks to Jake & Bryan Cripe for trucking grain and Randy at Woosley Bros. for crop input application.

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
