Test Comments: Jerry was excited to report excellent corn yields in most of his fields this season! The trials were no exception. They had excellent plant emergence that produced large girthy ears. Kernel set, grain quality and kernel depth were excellent. Plant height ranged from 7 to 9 feet. The lodging scores reflect stalk lodging from stalk rot.

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
