**Test Comments:** Site was planted later on account of relentless spring rains. Rainfall totals; May-16.0", June-5.75", July-2.75", & August-0". At some point after pollination, a strong wind storm root lodged the trials. It laid some hybrids completely flat, but they did gooseneck upright enough making harvest possible. Ear development, kernel set & kernel depth were all good. Plant height ranged from 8-10'.

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
