**Test Comments:** *Crop got a good start with excellent emergence and early vigor. Crop was able to reach full maturity as grain moistures were dry for this season. Grain quality was good with bright color. Good ease of shell considering all the trash going through. Like Dennis said, "it is nice to burn this much fuel to harvest a good crop, than run all day to get a hopper full". Low lodging scores as only plant tops broke off.*

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
