Test Comments: *When we were finally able to plant this location, it was the best conditions available this spring. But Mother Nature had other thoughts. Two days after planting, the site received 3+ inches of rain. Plants did not emerge until the next major downpour. When the rains came this year, it was mostly 2-5" per event. All tests were lost to ponding that made it impossible to get two replications of results.*

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
