**Test Comments:** *A tough time to get a crop planted this spring. A small window was open with good conditions that we luckily hit. Crops planted in this area during this time frame had good emergence, catching right weather. Yes, we got lucky. Plant health was good as light disease was present, still green leaves and stalks. Corn kernels had light red streaking in them and test weight ranged from 56 to 59 lbs per bu.*

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
