Test Comments: *A nice strong uniform emergence and low stress made for a nice crop. No disease was present and standability was excellent. This area had ample rain all season. Bill said yields were remarkably high, the best he has ever seen. Area yields in the 230+ bu per acre range. Bill also commented that pollination temperatures were in the 80s with night time temperatures cooling off help make this crop.*

† See last page for footnote information. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average. **Italicized** brands exceed the grain moisture limit for this test. **GC** = grower comparison product, **ns** = not significantly different
