TEST COMMENTS: This test site did very well for the conditions it went through during the growing stages. Plants were average in height, upright (minimal lodging), full of pods, well matured and very dry which made harvest easy. Pods were small and contained small sized low moisture seed. The test average yield was above the surrounding fields. No weed or major diseases were seen.

† See last page for additional information. Results in **bold** are significantly above the test average. **CK** = check and **GC** = grower comparison products, **§** = United Soybean Board entry; **ns** = not significantly different.
