**TEST COMMENTS:** A wet May delayed planting at this no-till site. Good weed control, no disease pressure and no insects led to good yields. Plants were standing very good at harvest. No green stems and no pod shattering.

† See last page for additional information. Results in **bold** are significantly above the test average. **CK** = check and **GC** = grower comparison products, **§** = United Soybean Board entry; **ns** = not significantly different.
