Test Comments: *With 20 mph winds at harvest, you could see weak stalk issues. Stalks where breaking just above the roots causing the lodging scores you see. Ears were short and girthy with complete kernel fill, very good seed depth and sturdy cobs. Some hybrids had signs of weakening ear shanks. Rainfall was moderate in May and June but August brought approximately 12 inches rainfall.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
