Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Price = $\frac{\$3.00}{\$3.00}$ Local GMO non-GMO

Test Comments: In this area, the low lying fields saw a large yield drag due to all the rain and surface water runoff it received. Plants were healthy, well matured and standing great at harvest. Ears were short and slender with shallow kernel depth. Unlike the surrounding field, the tests did not receive additional nitrogen after planting. The yield of the surrounding field was noticeably better than that in the tests.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
