Test Comments: *This location looked great all year. Emergence was excellent, with almost every seed germinating, and early season growth was all uniform. Rainfall was good leading up to pollination, and it appeared that every ear was filled to the tip. The site caught more timely rains during grain fill, which produced some nice deep kernels. The only downfall was test weight which ranged from 53 to 57 lbs.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD (0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
