TEST COMMENTS: *Emergence was good, with adequate soil moisture at planting. Generally a good growing season but there was a dry period in July where beans were able to hang on until August showers finally arrived. Standability was excellent and disease pressure was not an issue. The crop harvested extremely well. Overall rating of the test is 8 out of 10. (10=best)*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
