Test Comments: *Planting season was dry but rains started to come in June, sometimes at amounts too much. Corn looked good all summer and right up till harvest. Some stalk rots caused a few hybrids to fall over but had no difficulty harvesting. Overall rating of the test is 7 out of 10 (10=best).*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD (0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
