Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.94; non-GMO = \$3.94

Test Comments: *Seedling establishment was very good and uniform. This field, like others in the area, received a side-dress application of anhydrous ammonia. Either the soil was too dry or applicator knives were too shallow allowing anhydrous ammonia to escape causing severe damage to corn plants in this test and surrounding field. The resulting nonuniform plant growth forced us to abandon the test.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD (0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
