**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.5 Drying = \$0.038 Prices: GMO = \$3.50; non-GMO = \$3.50

**Test Comments:** *Consistent rainfall this growing season delivered totals near normal in this area to provide good opportunity for ear development and pollination. Cool spells from mid-June to early July and from mid to late August slightly delayed maturity. Significant below ear stalk lodging was observed but harvested well with minimal ear loss. Bob said corn reels were needed to harvest some lodged area fields.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
