Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.5 Drying = \$0.038 Prices: GMO = \$3.50; non-GMO = \$3.50

Test Comments: *This beautiful crop received above average rainfall (8.5" over normal) all season and had little stress. Only yield limiting issues were some northern corn leaf blight and extended periods of saturated soils that stunted growth. Plant height was relatively short but ears pollinated well and kernel depth was excellent. Weak ear shanks were noted and brittle stalks resulted in some hybrid specific lodging.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
