**Test Comments:** *The season was a bit dry until July 15. Timely rainfall continued from late July through August. Season ended 6.25" over 30-yr average. Plant height approached 12 ft on some hybrids. Ears set kernels to the tip. Deep kernels gave excellent test weight. Northern corn leaf blight was noted in-season, but overall plant health was very good. Dave had record setting soybean and corn yields this year.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
