Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.60; non-GMO = \$3.60

Test Comments: *This location started off with excellent emergence and had super saturated soils during June and early July. Crop conditions improved as the season went on. There was very little lodging to speak of. Ear retention was still good at harvest. There was evidence of gray leaf spot and anthracnose present. This was a nice uniform test considering the early season struggles that it sustained.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
