Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.60; non-GMO = \$3.60

Test Comments: *This site was planted early in the season, and maintained good plant growth all of May. June added heavy amounts of rainfall that caused corn stunting in areas where soil was completely saturated. Plants were nice and healthy at the time of harvest. There were a few hybrids that had some green snap from an earlier wind storm. Ears were nice and girthy and filled to the tips on most hybrids.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
