Ear height ranged from 1 to 3 ft above the soil. Ear size ranged 12 to 16 kernel rows with 24 to 36 kernels in length. Crop was standing nice with most all the leaves still attached. One replication was removed to minimize standing water impact on results.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
