**Test Comments:** *This site was planted into excellent conditions. Despite receiving several hard rains after planting, emergence was still good. This site received over 33 inches of rain from planting through August 15, which is around twice as much as normal. Weed control was excellent. There was some gray leaf spot and common rust present. Corn was standing well at harvest, but stalk quality was diminishing.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different

**Test Comments:** *This site was planted into excellent conditions. Despite receiving several hard rains after planting, emergence was still good. This site received over 33 inches of rain from planting through August 15, which is around twice as much as normal. Weed control was excellent. There was some gray leaf spot and common rust present. Corn was standing well at harvest, but stalk quality was diminishing.*
