Test Comments: *Stalks at this site were still holding strong with very little lodging problems. Winds gusting up to 20 mph were blowing at harvest and plant tops were snapping over. Ear shanks were showing signs of weakness. Ears were long, narrow, well pollinated and had strong cobs making shelling easy. Some leaf blight was seen. The warm dry weather dried plants down quickly this fall.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
