Test Comments: *This location looked good all season long, almost perfect emergence for most of the hybrids. Rainfalls were good and timely along with desirable moderate temperatures this growing season. The full season hybrids still contained a bunch of green stalks and green leaves. The early season products demonstrated excellent dry down. Stalk quality was great for almost the entire test.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
