Test Comments: *Corn emergence was excellent, very uniform population. Rainfall for much of the summer was good with only short dry periods. Disease pressure was low with some anthracnose and gray leaf spot. Like the population, yields were very good and uniform as well. Overall rating of the test is 8 out of 10 (10=best).*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD (0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
