Test Comments: *Corn looked nice for most of the growing season. A late September storm hit and caused some severe broken stalks to higher ear placed and fuller season hybrids. Most broken stalks occurred a few feet above the soil surface which allowed for close to 100% going through the combine. Overall rating of this test is 7 out of 10 (10=best).*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD (0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
