**Yield & Income Factors:** Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.050 Prices: GMO = \$3.50; non-GMO = \$3.50

**Test Comments:** Really good planting conditions early and we had a good planting date. The corn was in good condition at harvest with no lodging issues. In the ultra-early season test, most hybrids had lost all of their leaves and all that was left standing at harvest was a stalk with an ear. The area corn harvest has been above average this year.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
