Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.045 Prices: GMO = \$9.00; non-GMO = \$9.00

Test Comments: *Very good planting conditons as many fields in the area got planted in April this year. We observed some weed pressure in June as the wet weather persisted and delayed herbicide applications. Grain moistures were very good and yields may have lagged a little from some of the stress in June.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceeded the grain moisture limit for this test. **ns** = column values not significantly different
