Test Comments: *We delayed planting this site until May 22 which was after the bulk of area corn planting had finished this year. Not many negatives to say about these tests, Mother Nature seemed to get everything right this year. We had good results at this location with strong yields and low variability.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
