Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.030 Prices: GMO = \$3.60; non-GMO = \$3.60

Test Comments: This was another location that had ideal planting conditions and the final stand counts demonstrate that. Rainfall for most of the season was ideal especially for this lighter sandy soil. The earlier season hybrids experienced a better pollination period.

Everything had great kernel fill and ears were filled almost to the tip every time. There was little evidence of any yield limiting diseases.

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
