Test Comments: *It was extremely cold the day we planted here, even got sleeted on. Despite the cold start, emergence was almost perfect, and uniform. Most hybrids had really good vegetative growth, some reaching 12' tall. Pollination was good as well, there was very little tip back. Kernels were good and deep. Stalk quality was still excellent, some still green at harvest. Very little evidence of many diseases.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
