TEST COMMENTS: *The site was planted in good soil conditions this spring. Seedling emergence and plant growth were very good and uniform. The trial was located in a tiled field that helped manage excess June rains. Plant heights ranged from 36-40". Pod development and grain quality were excellent.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
