**Yield & Income Factors:** Base Moisture = 13.0% Shrink = 1.0 Drying = \$0.000 Prices = \$9.20 GMO; \$9.20 non-GMO

**TEST COMMENTS:** *Planting conditions were marginally wet, which effected some varieties on emergence. Plants were short to medium in height. Stems were really small in diameter, but most varieties were standing almost perfect. Seed size was medium to large depending on the variety. It was difficult to find much for diseases in the plot. From a combining stand point, almost all beans cut and threshed easily.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
