TEST COMMENTS: *An attempt to plant this location was made on June 11th, but soil conditions were just too wet. The planter was not able to close the seed furrow. The next opportunity to plant would have been July 4th weekend. At that point it was decided that it was too late in the season to receive meaningful quality data from a yield trial.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
