Test Comments: *The plot was located on a slightly rolling site close to Rod's place. As a result of the close proximity, all the nutrients applied to this plot are derived from dairy manure. Planting conditions were ideal here this spring. Rainfall was abundant the entire growing season. Total monthly rainfall for July and August was 3+'' per month above the area 30-year avg. Plants stood very well at harvest.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
