Yield & Income Factors: Base Moisture = 15.0% Shrink = 1.3 Drying = \$0.025 Prices: GMO = \$3.00; non-GMO = \$3.00

Test Comments: *We had good spring weather and timely planting. Weather conditions turned favorable at harvest and the grain moistures have slowly fallen as dry sunny weather started to dominate. Healthy upright plants gave no issues for harvest. Some plot areas were excessively wet causing variable yields. This variation coupled with a harvest error in the full-season test caused that data to be rejected.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
