Test Comments: *We had excellent planting conditions and overall, it was a good year for this location. We received timely rains and our farmer cooperater, Floyd Snoozy, said "it seemed like we never had any stress on the crops all year". At harvest, corn stood straight, still had most of leaves intact, and cobs were filled with kernels to the tip. A slight yield advantage was seen for plots on the lower lying ground.*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
