**TEST COMMENTS:** *Unfortunately this test site was lost, due to inadequate weed control. The planting date of the surrounding field and that of the test site were off just enough to result in subpar weed control within the test area. The situation was realized too late to rescue the test as soybean yield was already reduced by the weed competition.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
