**TEST COMMENTS:** *The plot at this location had excellent stands early on. The only issue being a slight iron chlorosis problem that affected rep 4, which is closest to the field edge. The month of July had a wet spell, with the test location receiving seven inches of rain in a three day period. Our farmer cooperater, Jay Myers, felt the foliar fertilizer applied on this field had a positive yield impact this year.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
