**Yield & Income Factors:** Base Moisture = 13.0% Shrink = 1.3 Drying = \$0.020 Prices = \$9.00 GMO; \$9.00 non-GMO

**TEST COMMENTS:** *The site had ample moisture from planting through June. Most of July was dry (1.1" below normal) but rains returned in August delivering 2.8" above normal. Bean plants had fairly uniform height around 24". Soybean grain was large. Very clean test with no weed issues. The yield results show the growing season favored the full season soybeans this year.*

† See last page for abbreviation descriptions. Results in **bold** are significantly above test average by LSD (0.10). **ns** = column values not significantly different.
