Test Comments: *Corn looked great all growing season long. Good soil moisture, timely rains and lack of excessive heat kept corn yield high. Late season storm also gave good stalk strength ratings, main disease was anthracnose. Overall rating of the plot is a 8 out of 10. (10=best)*

† See last page for abbreviation descriptions. Dark colored row identifies the check product found in early- and full-season tests. **Bold** yields are significantly above test average by LSD(0.10). **Italicized** brands exceed the grain moisture limit for this test. **ns** = column values not significantly different
